Veratrak

Redefine Collaboration.

Veratrak connects the life sciences supply chain, pairing innovation with breakthrough technologies to deliver remarkable results.

We started on a mission to develop the world's first live blockchain solution for the life sciences industry. Since then, we've set our sights on becoming the pre-eminent technology partner for the life sciences supply chain.

Enterprise SaaS solutions that redefine collaboration.

Our award-winning software solutions enable participants along the life sciences supply chain to collaborate in new ways.

Purpose built for healthcare and life sciences.

Purpose-built for life sciences, we deeply understand the challenges, complexities and idiosyncrasies of the industry.

Long-term, trusted technology partner.

We invest the time to understand the specific opportunities that unlock remarkable value for our customers.

HUB.

BY VERATRAK

The Hub, by Veratrak

A single, unified platform for managing your supply chain partners

The Hub, by Veratrak links systems across pharmaceutical, logistics and contract packaging /manufacturing organisations to facilitate collaboration, improve visibility and generate efficiencies across supply chain operations.

Creating a cloud-based, scalable and single source of truth for logistics and warehousing services unlocks cost savings and collaboration possibilities not historically available to external organisations.

Key benefits

Deliver cost savings

Streamline supplier integration, onboarding and production.

Meet sustainability goals

Identify and act upon unused capacity to reduce emissions.

Reduce operational risk

Enforce harmonious standards across outsourced portfolio.

Notifications for advanced monitoring

Access dashboards to monitor integration workflows with partners.

Technical resiliency & flexibility

Any file format supported from CSV to XML, EDI or JSON, and any communication protocol from FTPS, SFTP to AS2 or API.

Safeguard data integrity

Create immutable audit logs for sensitive information.
